PROFESSIONAL SUMMARY

Dynamic and results-driven Lead Developer with a proven track record of architecting robust enterprise web applications, driving complex software deployments, and leading high-performing technical teams. Expert in leveraging full-stack JavaScript and Python frameworks alongside modern cloud infrastructure to deliver scalable digital solutions. Highly adept at translating business objectives and client requirements into concrete architectural designs while actively managing delivery sprints and technical team structures.

CORE COMPETENCIES

Frontend Engineering React.js, Next.js, Vue.js, Redux, JavaScript (ES6+), HTML5, CSS3, Responsive Web UI
Backend & API Design Python, Django REST Framework, FastAPI, Node.js, RESTful API Engineering, System Architecture
Cloud & Infrastructure PostgreSQL, MySQL, Linux VPS Hosting Management (Hostinger), AWS Basics, Server Architecture, CI/CD
Technical Leadership Engineering Team Management (25+ members), Agile & Scrum, Technical Client Advisory, Technical SEO

PROFESSIONAL EXPERIENCE

Lead Developer — [MarketBytes | Infopark, Cherthala](#) June 2024 — June 2026

Direct and manage a high-capacity engineering division comprising 25+ technical team members, supervising cross-functional workflow management, technical delivery timelines, and performance evaluations. Architect and coordinate the deployment of end-to-end full-stack web environments utilizing Python (Django/FastAPI) backends linked to responsive Next.js/React.js client interfaces. Serve as the chief client-facing technical consultant, gathering intricate system specifications from international clients and rendering them into resilient technical pipelines. Govern server infrastructure landscapes on Hostinger VPS and AWS environments, maintaining system security patches, optimization protocols, and maximum operational uptime.

Senior Developer — [PixelBoho | Kochi, India](#) August 2023 — May 2024

Engineered custom frontend applications using React.js, targeting performance bottlenecks, web vitals optimization, and highly modular component development. Constructed clean, maintainable, and deeply scalable custom APIs and microservices utilizing Django REST Framework to handle multi-tenant platforms. Collaborated with design stakeholders to execute pixel-perfect, highly accessible responsive layouts across diverse user configurations.

Junior Developer — [Ezer Developers | Kochi, India](#) May 2023 — August 2023

Developed clean, documented modular interface components using JavaScript, basic React.js, and standardized backend practices. Assisted senior staff in regular server migrations, system hosting setups on commercial VPS systems, and custom domain routing. Refactored legacy codebases to improve processing latency, optimize raw SQL query lines, and correct operational software bugs.

SELECTED PRODUCTION DEPLOYMENTS

TaxMind (AI FinTech Platform): [VUE.JS](#), [NODE.JS](#), [POSTGRESQL](#), [AWS](#) — Architected an advanced tax automation framework consisting of a consumer-facing digital suite and an operations dashboard panel.

Crossroads Enterprise Architecture: [REACT.JS](#), [DJANGO REST FRAMEWORK](#), [MYSQL](#), [VPS](#) — Configured and launched an enterprise corporate presence driven natively by a robust custom-tailored CMS management platform.

Saki Visa Management Network: [REACT.JS](#), [DJANGO REST FRAMEWORK](#), [MYSQL](#), [VPS](#) — Implemented a secure application submission network featuring complex administrator panels tasked with managing critical document pipelines.

Yokobaine (Admin and Site): [NEXT.JS](#), [PYTHON FASTAPI](#), [MYSQL](#), [VPS](#) — Built a comprehensive administration ecosystem and client-facing platform with automated backend pipelines.

MuvrCloud Application Suite: [REACT.JS](#), [DJANGO REST FRAMEWORK](#), [MYSQL](#), [VPS](#) — Designed a modern operations platform and logistics engine supporting custom survey methodologies and centralized backend analytics pipelines.

Prime CRM & Innovation Site: [REACT.JS](#), [NEXT.JS](#), [DJANGO](#), [FASTAPI](#), [MYSQL](#), [VPS](#) — Engineered an extensive internal CRM, customer validation subsystems, and high-performance corporate platforms featuring custom content management engines.

Global Technical SEO Architecture: [SEARCH ENGINE ENGINEERING](#), [WEB ANALYTICS](#) — Architected high-performance technical SEO strategies and structural schemas for international enterprises including ALSI Global and Wilmarcs.

EDUCATION

B.C.A. (Computer Applications) — [Mar Kuriakose Arts and Science College | Puthuvely, Koothattukulam](#) Graduated 2022
